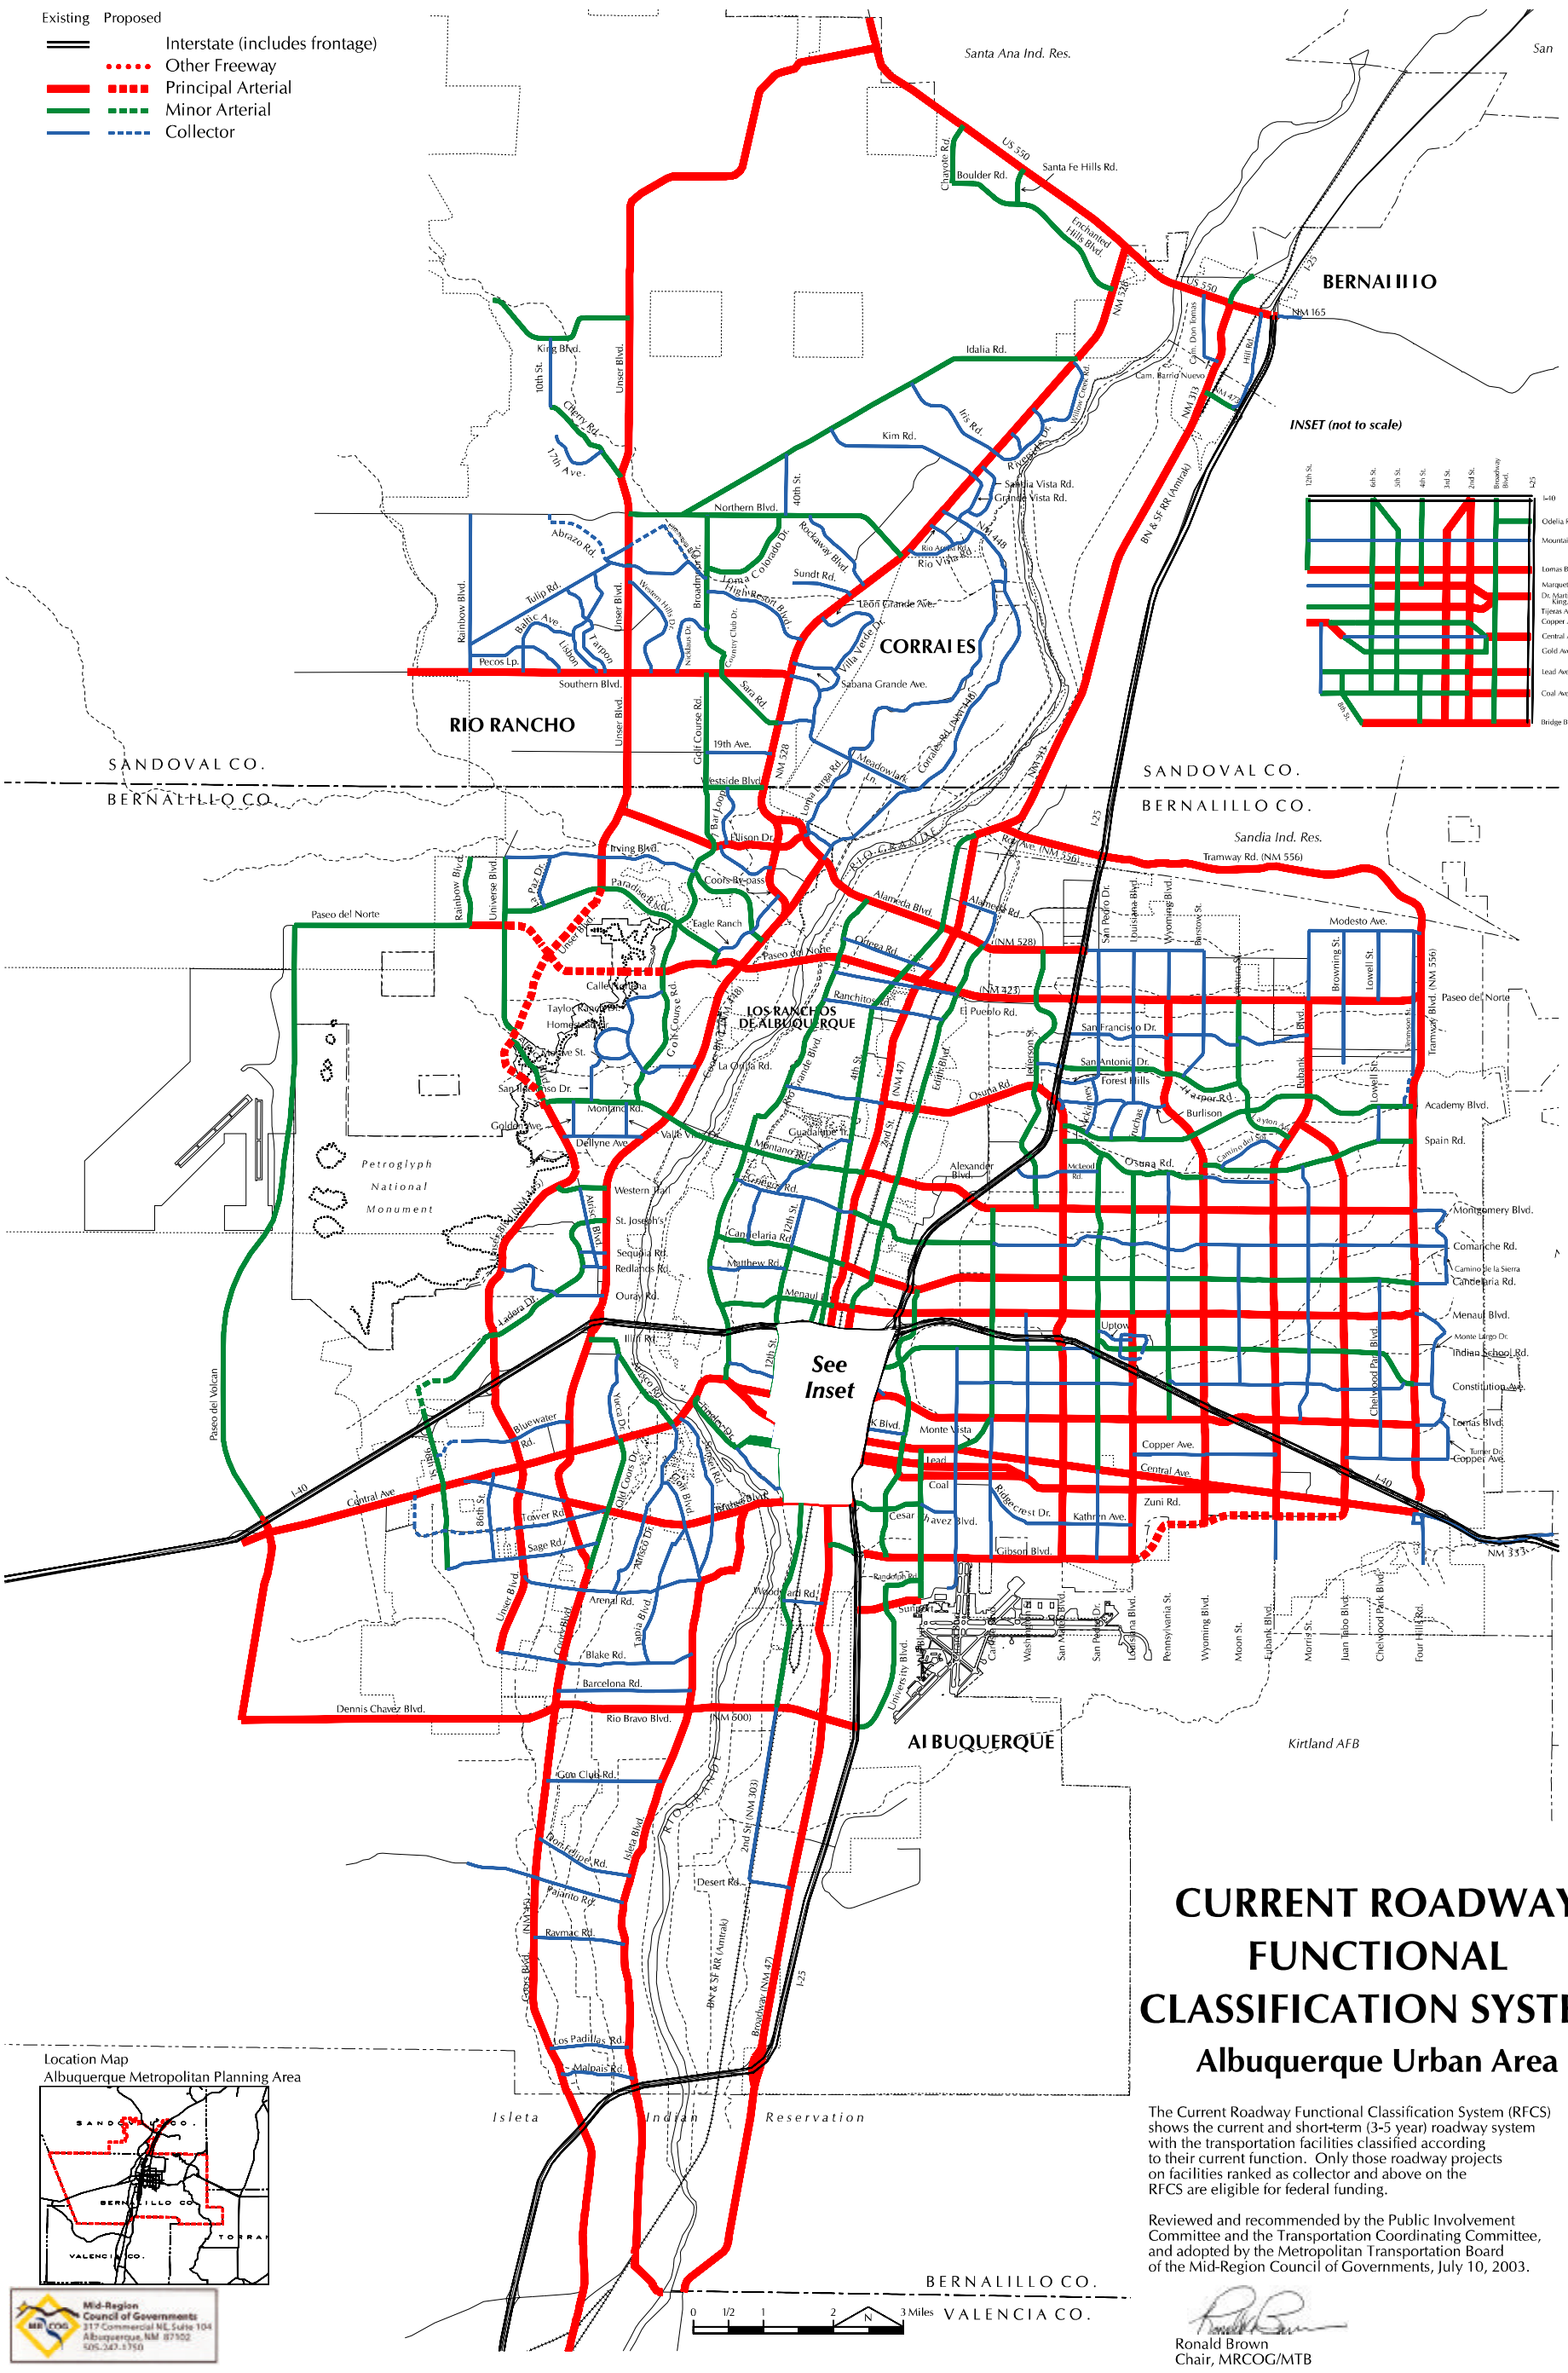
- Minor Arterial
- Collector



CURRENT ROADWAY FUNCTIONAL CLASSIFICATION SYSTEM

Albuquerque Urban Area

The Current Roadway Functional Classification System (RFCS) shows the current and short-term (3-5 year) roadway system with the transportation facilities classified according to their current function. Only those roadway projects on facilities ranked as collector and above on the RFCS are eligible for federal funding.

Reviewed and recommended by the Public Involvement Committee and the Transportation Coordinating Committee, and adopted by the Metropolitan Transportation Board of the Mid-Region Council of Governments, July 10, 2003.
